CONFIDENTIAL INFORMATION

Do not distribute outside of Takeda.

1.0 OBJECTIVE

The purpose of this document to explain to end users how to use Digital Accruals Solution tool developed by the EDGE program. This document will be updated to cover the new features developed for additional future releases.

2.0 INTRODUCTION

The current Power BI Accrual Reporting Solution has functional and technical challenges which prevents it to be scaled to larger user audience and limits the expected business impact.

In future the application will provide simple and intuitive online tool for PO (Purchase Order) Owners (or their representatives) to review and update work completed for open POs in a timely manner for accurate accrual reporting and automated posting to ECC

The Digital Accruals application will deliver the following elements of functionality

- Different access roles for reviewing and updating data
- View worklist with all open POs with calculated work to date
- View exclusion POs where user can't change any data
- Automatic data updated between ECC and Edge
- Automatic process to interface accruals data for ECC to process GL posting
- SOX controls in updating and executing data, Audit/change history
- Automatic accruals calculations based on work completed
- Notification for any open POs to review by email
- View service POs below threshold where Pos will be straight lined by default and user can't change accrual method or work completed details

3.0 LINK TO THE APPLICATION

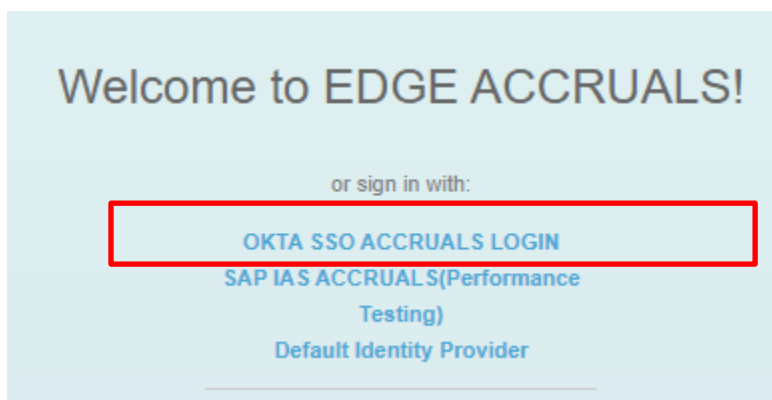

Please follow the following link to launch the application:

<https://edge-accruals-prd-accrual-approuter.cfapps.eu10.hana.ondemand.com/cp.portal/site#Shell-home>

4.0 KEY FEATURE OVERVIEW OF THE APPLICATION

4.1. LOGIN

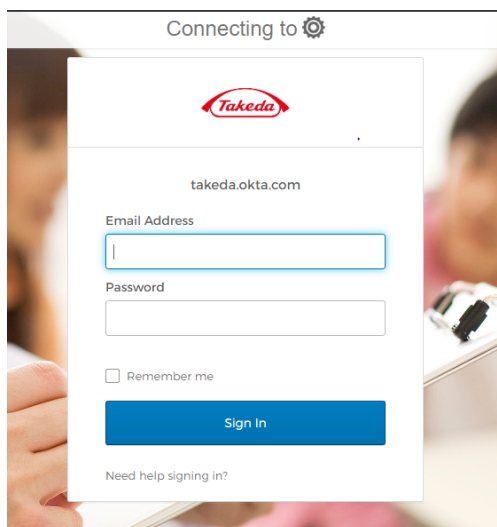

4.1.1. Users will be able to access the application using an SAP Fiori URL. Authentication will take place using OKTA login.

After clicking the OKTA link, the user will be directly navigated to the SAP Fiori launchpad if the user is already logged in to OKTA through any other application.

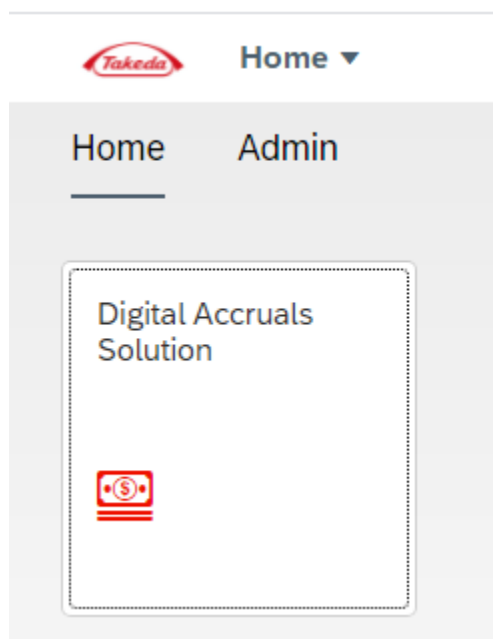

For non OKTA users, please provide login details when prompted:

- User – Takeda email id
- Password – Takeda password

4.2. SAP FIORI LAUNCHPAD

Upon successful login authentication, users will be taken to the SAP Fiori Launchpad where tiles for all the user's SAP Fiori applications will appear. To launch this tool, click the Digital Accruals Solution tile.

4.3. DASHBOARD

Upon entry to the tool for different actions, the user will be presented with the tiles based on role and access. Active POs lines will be pulled from ECC for indirect service and material Purchase Orders. POs which are excluded in ECC will appear in exclusions ('For Information Only') section, POs which are below threshold value will be by default straight lined for accruals calculation and will appear in below thresholds section. These POs will not need any action from PO Owners.

POs which need review and update will be shown in the 'To act on' section and PO Owners will need to review and update service completed amount or % if required.

At month end (cutoff date), Accrual details will be sent to ECC and ECC will post accruals to GL

Active POs will appear in 3 different sections in dashboard:

1. To Act Upon – This section will display all POs where PO Owner is responsible for review and update of PO details (service completed amount or percentage)
2. Exclusion POs – This section will display POs which are active for PO Owner but excluded for accruals in ECC and needs to update. But this will give complete picture of all POs.
3. POs Below Threshold – This section will display all POs which have PO value below threshold level (configurable in application)

1. Role Based Access to Application

Application will provide access to application based on the role of the logged in user. Below roles will be in scope in application and will have required access.

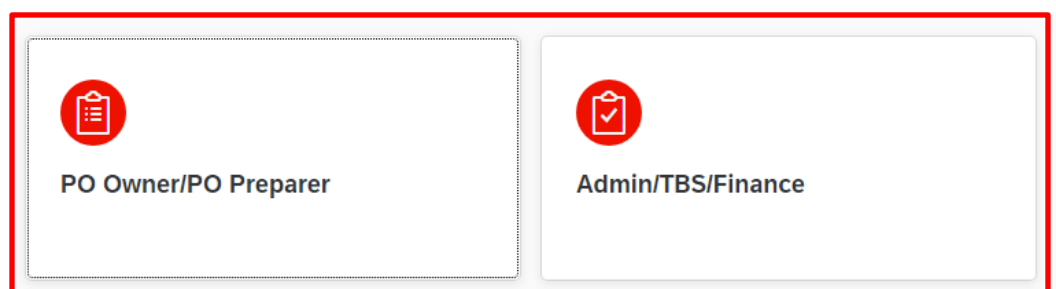

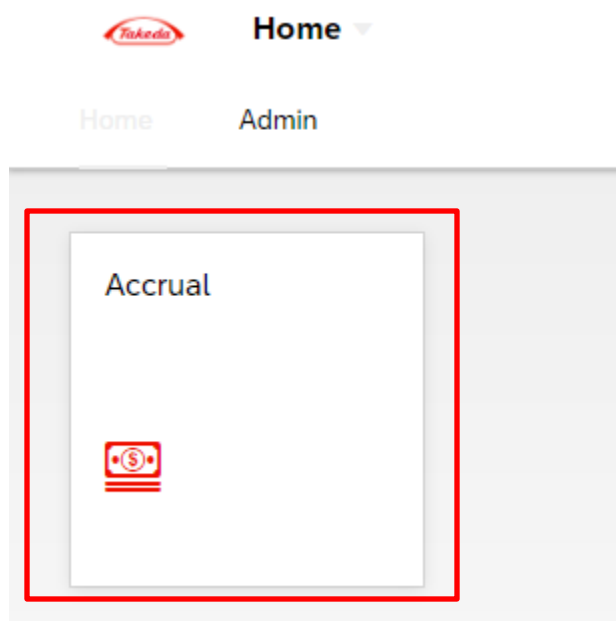

- PO Owner - All PO Owners maintained at PO line in ECC will be able to view dashboard and will have access to review and update POs
- PO Preparer - All PO Preparers maintained at PO line in ECC will be able to view dashboard and will have access to review and update POs
- Admin - Email Id of individuals will be maintained in the Digital Accruals Application against company codes. Admins will be able to access POs for company code they have access to. Admins will be able to view dashboard and will have access to review and update POs for respective company codes.
- TBS (Takeda Business Solutions) – Email Id of individuals will be maintained in application against company codes for TBS. TBS will be able to access POs for company code they have access to. TBS will be able to view dashboard if they have read access and will be able to review and update POs if they have written access in exception cases for respective company codes.
- Finance – Email Id of individuals will be maintained in application against company codes. Finance will be able to access POs for company code they have access to. Finance will be able to view dashboard, review POs and notify PO Owner for respective company codes
- TBS/Finance user will have access based on company codes. One TBS user can have access to multiple company codes. Mapping of company codes to TBS users will be provided by business along with read and write access required for each user
- Roles will be maintained as part of configuration and maintained by support team
- Options to choose from in home page for logged in user. User will get access options based on role. Both the options will be available for individuals having multiple roles. PO Owner and PO Preparer will directly land into the dashboard screen
- Users (Admin/TBS/Finance) can use below service now link to raise ticket for requesting access to application with details:

Name of User and Email Id

Country and Company Code

Role and Read/Write access in case of TBS/Finance (exception cases)

https://takeda.service-now.com/nav_to.do?uri=%2Fincident.do%3Fsys_id%3D-1%26sysparm_query%3Dactive%3Dtrue%26sysparm_stack%3Dincident.list.do%3Fsysparm_query%3Dactive%3Dtrue

2. Dashboard for PO Owner/PO Preparer/Admin

All PO Owners, PO Preparers will be able to login to the application and view dashboard for all open indirect material and service POs. Admin will be able to view POs for company codes they have access to

- On login to application user will see dashboard having summary, PO details which needs review, exclusion POs and POs below threshold tabs
- User will be able to see POs where logged in user is PO Owner or PO Preparer as per ECC PO line details
- In summary section user will be able to view currency, total number of purchase orders user has access to, count of service POs, count of material POs, Total amount of Purchase Orders, Total work completed amount, Total invoiced amount and Balance amount to be accrued

- If user has access to multiple currencies, summary section will split currency wise and details will appear per currency
- User will be able to view review start date and cut-off date (23:59 CET) every month in the dashboard

Open Worklist July 2021

- Value below threshold will be checked against PO value maintained in ECC
- POs below threshold will include service POs only
- Below threshold POs will be non-editable and straight lined (service POs) by default in application and user will be able to only view data
- User will not be able to update to change accrual method for POs below threshold
- Summary and accruals posting will include POs below threshold as well
- Work completed to date will be disabled for below threshold cases
- Users will be able to select layout, filter and sort columns

To act upon For information only **PO below threshold**

PO Number: Line Item: Supplier Name: **Go**

Below Threshold (3) **Standard***   

PO Number	Line Item	Supplier Code	Supplier Name	PO Line Description	PO Value	Service Start Date	Service End Date	Straight Line Method
8000252214	00001	0000306923	Klick Inc	Dexilant Hosting Agreement June - Klick	1,000,00 CAD	01 Jun 2020	30 Jun 2022	☒
8000266277	00001	0000474119	MCI Group Canada Inc	TRAVEL LOGISTICS FOR SPEAKER TOUR - Cana	718,99 CAD	01 Jul 2020	31 Dec 2020	☒

6. Accrual Method and Calculation

- PO Owner will be able to view amount to be accrued in dashboard at line level
- Amount to be accrued will be calculated for service as well as material POs
- Amount to be accrued field will be non-editable for users and will be view only
- Calculation for service POs will be work completed to date amount- invoice to date amount (Amount to be accrued = work completed to date-amount invoiced to date)
- Calculation for material POs will be Goods Receipts to Date- Amount Invoiced to Date
- Amount to be accrued will change dynamically as soon as work completed to date is updated for service POs or as per updated calculation for straight line POs
- At PO line level- Amount to be accrued will be in same currency as PO line currency
- Straight Line Accrual Method for service POs- Total PO value will be split between service duration for every month and will be displayed for current month

If the Start/End Date falls in the first half of the month, this is considered 1 month, whereas if it falls in the latter half of the month, this is considered 0 months.

Calculation: PO Value/PO service duration(months) * total months elapsed

If service start date is greater than 15th of the month then month will not be covered in months elapsed. If service end date is less than 15th of the month then month will not be covered in months elapsed

Sample Calculation: As of 8/31/21

Service Start Date	Service End Date	# of Months Elapsed	#Total Months
24 Feb 2021	14 Aug 2021	5.00	5.00
24 Feb 2021	31 Aug 2021	6.00	6.00
07 Aug 2021	11 Sep 2021	1.00	1.00
20 Aug 2021	28 Sep 2021	0.00	1.00
25 Mar 2021	31 May 2022	5.00	14.00
01 Jan 2021	01 Apr 2022	8.00	15.00

- Work to Date Accrual Method for service POs - Total PO amount of service completed till current month
- Accrual method by default for new POs will be straight line and checkbox will be checked. In this case Work completed to date will be calculated for current month based on straight line calculation. In case user updates the amount or percentage, straight line will be unchecked and accrual method will be work to date. Also, if user unchecks 'straight line' checkbox, accrual method will change to work to date and user can update the amounts in work completed to date as per current details on top of straight-line calculation
- Accrual method will stay same as last month and if in last month accrual method was straight line, as per current month work completed to date will have values as per straight line calculation

7. Update Service Completed Amount or Percent

- User will be able to view work completed to date as amount as well as percentage of total amount for service POs
- User will be able to enter only numeric fields in these fields. In case of non-numeric value, application will raise error
- Update of 1 field (amount or percentage) will update the second field as well according to the calculation ex. if user will update amount from 200 to 300(total is 1000), % field will be updated to 30% from 20% and vice versa
- Checkbox will be available to select multiple or all records. Select all option will be available
- Total work completed to date (amount and %) will be editable fields. Only numbers will be allowed in these fields - for service POs
- Button 'Mark as Reviewed' will be available at the bottom. On clicking mark as reviewed, all PO and lines which were updated by user and which are not updated will be available in pop up
- User will not able to enter total amount more than PO line amount or % more than 100. Validation will be there that amount cannot be more than PO line amount
- User will be able to update amounts or percentage only service POs and click on 'Mark as Reviewed' to save details

Services Completed Amount	% of Services Completed	Invoice Amount to Date	Amount to be Accrued	Straight Line Method
30.000,00	60.0	7.250,00 CAD	22.750,00 CAD	☐

0,00	0.0	0,00 CAD	0,00 CAD	☐

Mark as Reviewed

8. Audit History

- Audit history will be tracked for service and material POs both only for changes in 'To Act Upon' tab
- All changes made to PO lines will be tracked in audit history – if reviewed, change in accrual method or change in service amount
- Audit history will track who made the changes (email id) and when (date and time along with time zone 'CET')
- User will be able to download changes based on audit history in excel
- Audit history will include changes made to work to date amount and percentage, details of review, changes made to accrual method (straight line to work to date or vice versa)
- If same PO line is reviewed 5 times in a month, all changes will be tracked as audit history

10. Email Notifications to Users

- User will receive email with all open POs for service and material, Email will be sent to PO Owner and PO Preparer for respective PO on which action is pending
- Email will be sent to Admin based on data user has access to, Mail with information will be sent to TBS/Finance team as well with same frequency for reviewing details. User will have access based on company code
- Email will have link for the tool along with steps users has to take based on role
- Email will be sent every month for open POs only. The ones which are already reviewed by either PO Owner Preparer or Admin will not be part of next reminders
- If action is taken on all POs on first mail, second reminder will not be sent to PO Owner, PO Preparer or Admin
- Notifications will be sent on workday (from cutoff date)-10, -5, -2 days from cut off from calendar work dates excluding weekends
- Content of the email will be different based on user who will receive the email
- Mail will only include the details which are not reviewed yet

11. View and download Reports

- User will get option to download report in dashboard tab, exclusion tab and straight-line threshold tab
- User will be able to download data in excel format
- All the details available in dashboard that point in time will be downloaded in report
- If user has updated WTD multiple times - recent one will be available in report. example - WTD for June 21 was updated from 200 to 300 on 7th June and 300 to 500 on 10th June and 500 to 800 on 20th June. If report will be downloaded on 21st report will show WTD amount as 800
- Report will include service and material PO details depending upon selected section
- User will be able to apply filter as well and download the report based in applied filters
- At cut-off, point in time data which is available in dashboard for all open POs will be sent through email to project team for review which can be used for manual reconciliation if required

To act upon For information only Below threshold

12. Automatic Posting to SAP ECC

- Once in a month accrual will be posted to ECC from accruals solution as per point in time data at the time of cut off without manual intervention
- File with all the details of PO lines belonging to 'To act Upon' or which required user review and 'Below Threshold' will be sent to ECC for accruals posting
- PO lines which are reviewed or not reviewed - all will be sent to ECC based on point in time values of accruals
- Details will be sent for both service and material POs from edge to ECC
- Once file is posted to ECC - program will execute in ECC to post accruals using existing program (out of scope for Edge and will be taken care in ECC)
- File will be sent at 23:59 CET every month to ECC with point in time data
